

+ summary

With the majority of post-secondary education in the STEM field, I approach tasks with a methodical perspective as well as strive to find new and unique ways to solve an obstacle. While most of my working career has been in the restaurant industry, the experience has provided the skills to work under extreme pressure in a fast paced environment while maintaining a professional and social manner.

+ projects

Deal Map TECH React Javascript NodeJs GatsbyJs MySQL MaterialUI MobX Auth0 Emotion	Feb. 2020 to Dec. 2021
